

Boosting online service

The next level performance and support

Complying with the highest IoT security standards, Gram Equipment is offering you a new, cloud-based VPN solution. With this certified technology, our Automation Specialists can connect fast in case you need remote assistance to support your production.

This VPN upgrade is an important step towards providing future-proof and high-performance production lines while having your security as our key priority.

Optimizing features:

- Fast and secure remote support
- Support by Gram Equipment Specialists
- Process optimization
- Ready for future 24h support contracts
- Ready for future data-based predictive maintenance

Technology features:

- Industry 4.0 compliant
- Designed specifically for the automation industry
- Cloud-based, future-proof solution
- Certified security by German ProtectEM

Contact our service teams for more details on how this will benefit your production.
