Mixed-reality assisted Factory Acceptance Test

The Remote Factory Acceptance Test is the latest addition to our current service portfolio when conventional factory visits are not optimal. By employing digitalization, we can now offer Remote FAT to make our expertise globally available. Through the help of smart goggles, real-time video streaming and internet connection, the remote FAT is performed swiftly, regardless of your location or timezone.

What to expect?

- Gram Equipment's technical/project manager performs the remote FAT
- The entire process is interactive, providing two-way communication between the client and Gram team
- The Remote FAT allows you to involve many more stakeholders, without further efforts on your side.

Benefits:

- Quick and efficient remote FAT
- Secure virtual alternative to conventional factory visits
- Lowest operating cost & TCO in the industry
- Real time video sharing & client response
- Increased participation in your organization.
